

Authorized Dealer of SofieLite™ Air Conditioner

The SofieLite™ is an all-in-one air conditioner for any aircraft. Improvements include larger fans, a new remote with fan controls, and higher efficiency. The unit is intended to be placed against the rear bulkhead to exhaust the heat. Cold air is blown out of the top of the unit into the cabin. The cold air can be ducted forward with two 3" diameter ducts or one 4.5" duct.

The advantage of this unit is the simplicity and low weight. The system is designed to simplify the installation by having the condenser built into the unit for an all-in-one package. The SofieLite™ is available in 12 volt and 24 volt versions with a wired remote control. The system is able to be removed in minutes when not needed for additional useful load and space. An optional GPU is available that allows the aircraft cabin to be precooled using a standard extension cord with the SofieLite™.

Specifications

14 VDC Model: 8,000 BTU

28 VDC Model: 13,000 BTU

35-75 Amperes: Adjustable

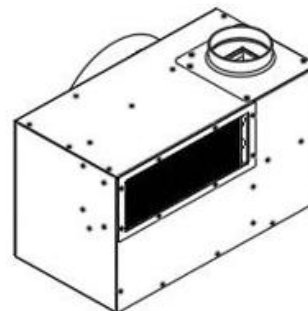

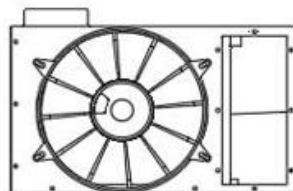

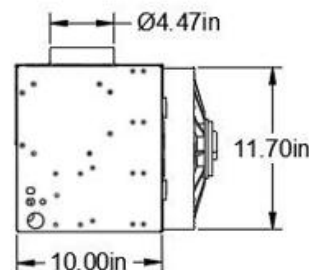

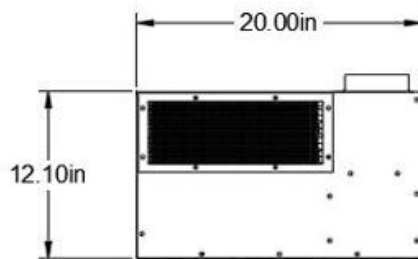

25-65 Amperes: Adjustable

Air Output: 240 CFM

Air Output: 300 CFM

100 Amp Alternator Recommended

Now weighing 38 Lbs
